EMMANUEL KAMSI

Data Analyst | AI Trainer & Evaluator

Remote • emmnuelkamsi@gmail.com • linkedin.com/in/emmanuelkamsi • github.com/emmnuelkamsi-lang • emmnuelkamsi-lang.github.io

PROFESSIONAL SUMMARY

Detail-oriented Data Analyst and AI Evaluator with hands-on experience in data analysis, AI response evaluation, data quality assurance, and technical support. Skilled in Excel, SQL, Python, Power BI, ChatGPT, and Claude. Experienced in evaluating AI-generated responses for accuracy, completeness, relevance, clarity, and tone, and in cleaning, analyzing, and visualizing datasets to build dashboards that communicate business insights. Fast learner with strong attention to detail, able to follow detailed guidelines and work independently in remote environments.

CORE SKILLS

AI Training & Evaluation: AI response evaluation & rating, output review, data quality, human feedback, response comparison, data annotation, accuracy/completeness/relevance/clarity/tone assessment, ChatGPT, Claude

Data Analytics: Data cleaning & transformation, validation, visualization, EDA, KPI analysis, dashboard development, Excel, SQL, Python, Power BI, Power Query

Technical & Professional: Technical support, software installation & configuration, troubleshooting, documentation, Microsoft Office, GitHub, remote collaboration

PROFESSIONAL EXPERIENCE

AI Response Evaluator / Data Quality Reviewer | *OneForma (Remote)* Aug 2025 – May 2026

- Evaluated AI-generated responses against project-specific quality guidelines, reviewing accuracy, completeness, relevance, clarity, and tone
- Compared multiple AI responses, rated them using structured rubrics, and documented clear reasoning for each decision
- Reviewed and improved weaker AI-generated responses; maintained consistency across evaluations while handling project data confidentially

AI & Data Evaluation Projects | *OneForma / Handshake / Independent Projects (Remote)* Aug 2025 – Present

- Built an AI Response Evaluation Demo and rubric based on Accuracy, Completeness, Clarity, and Tone
- Compared AI-generated responses, documented reasoning, and edited weaker responses to raise quality
- Developed practical experience in AI quality assurance, annotation, and human-in-the-loop workflows

Data Analysis Intern | *Edge Line Tech Academy* Aug 2025 – May 2026

- Used Excel, SQL, and Python to clean, organize, analyze, and visualize datasets, applying validation checks to improve accuracy
- Analyzed data to identify trends and business insights, and created reports/visualizations to communicate findings

IT Support Intern | *Transmission Company of Nigeria (TCN)* Nov 2023 – Dec 2024

- Installed and configured enterprise software across user workstations and provided end-user technical support
- Troubleshot software and computer issues, maintained technical records, and prepared reports

SELECTED DATA & AI PROJECTS

AI Response Evaluation Demo — *ChatGPT, Claude*

- Built a structured rubric (Accuracy, Completeness, Clarity, Tone), compared two AI responses, scored them, and edited the weaker one for quality

Sales Data Analysis & Dashboard — *Excel / Power BI*

- Analyzed 1,047 sales records across reps, brands, cost, and profit; built dashboards showing trends by region, product, and time period

Call Centre Performance Analysis — *Excel*

- Analyzed ~5,000 call records across 18 agents, evaluating satisfaction, performance, and call-reason trends

Sprocket Sales Dashboard — *Excel / Power BI*

- Cleaned and transformed data into an interactive dashboard tracking sales performance and customer trends

KPMG Data Analytics Project — *Excel*

- Prepared, analyzed, and visualized customer and transaction data to generate business insights

E-commerce & Spotify Data Analysis — *Excel / Power Query*

- Cleaned and analyzed e-commerce and Spotify datasets to surface sales trends, customer patterns, and KPIs
